

UniPrep CS Exit Exam Demo

Computer Science BSc Exit Exam - 2016 E.C. - Demonstration Material

Purpose	Live demonstration of PDF import, extraction, auto-classification, manual review, and approval
Format	9 multiple-choice questions with four options and an answer key
Note	Questions are original demonstration content, not an official Ministry exam paper

Instructions: Select the best answer for each question. The answer key is provided at the end for automated extraction and approval testing.

1. Which HTML element is used to associate descriptive text with a form input for accessibility?

- A. <section>
- B. <label>
- C. <article>
- D. <nav>

2. Which database normal form removes partial dependency on a composite primary key?

- A. First Normal Form (1NF)
- B. Second Normal Form (2NF)
- C. Third Normal Form (3NF)
- D. Boyce-Codd Normal Form (BCNF)

3. A process is waiting for a resource held by another process, and neither process can continue. Which operating system condition is illustrated?

- A. Starvation
- B. Fragmentation
- C. Deadlock
- D. Thrashing

4. Which protocol automatically assigns IP addresses to devices on a local network?

- A. DNS
- B. FTP
- C. DHCP
- D. SMTP

5. An intelligent agent receives rewards and penalties while learning how to maximize long-term performance. Which learning method is being used?

- A. Supervised learning
- B. Reinforcement learning
- C. Unsupervised learning
- D. Transfer learning

6. Which data structure follows the Last-In, First-Out (LIFO) principle?

- A. Queue
- B. Graph
- C. Stack
- D. Linked list

7. Which software development model organizes work into short iterations and encourages continuous customer feedback?

- A. Waterfall model
- B. Agile model
- C. V-model
- D. Big-bang model

8. Which compiler phase converts a sequence of characters into tokens?

- A. Code generation
- B. Semantic analysis
- C. Lexical analysis
- D. Optimization

9. A developer notices that a system behaves unexpectedly after deployment. What should be done first?

- A. Rewrite the whole system
- B. Inspect logs and reproduce the problem
- C. Delete the database
- D. Disable all user accounts

Answer Key

Question	Correct Answer
1	B
2	B
3	C
4	C
5	B
6	C
7	B
8	C
9	B

Explanations

- 1. Answer B:** The <label> element connects descriptive text to a form control and improves accessibility.
- 2. Answer B:** Second Normal Form removes partial dependency on part of a composite key.
- 3. Answer C:** Deadlock occurs when processes wait indefinitely for resources held by one another.
- 4. Answer C:** DHCP automatically provides IP configuration information to network devices.
- 5. Answer B:** Reinforcement learning uses rewards and penalties to guide an agent toward better actions.
- 6. Answer C:** A stack removes the most recently inserted item first.
- 7. Answer B:** Agile development uses short iterations, frequent feedback, and incremental delivery.
- 8. Answer C:** Lexical analysis groups characters into tokens before syntax analysis.
- 9. Answer B:** A controlled investigation should start by collecting evidence and reproducing the issue. This question is intentionally broad for manual-review demonstration.

Expected demo behavior: Questions 1-8 should classify into clear Computer Science topics. Question 9 is intentionally broad and may remain in manual review, demonstrating the human-in-the-loop approval process.
